OBJECTIVE

A position in software engineering with an emphasis on internet technologies, in an environment that encourages advancing one's skills and knowledge.

COMPUTER SKILLS

Primary Language: Javascript
Hobby Languages: C, Go, Java, Rust
Frameworks: React, Relay, Redux
Knowledge: HTML, CSS, SQL, Git, Node.js, Flow, Webpack, Babel, GraphQL

EXPERIENCE

Senior Front End Developer   **1stdibs, Inc.**
February 2015 - current   Manhattan, NY

- Develop the build process for the core React component library the company uses to keep consistent functionality and styling across its sites where single component implementations have multiple designs which get built and exported as their own components with interchangeable themes.
- Create a scaffolding tool for npm packages that require a transpilation process, helping developers get started on shared packages used by the frontend team without having to mess with webpack, babel, sass, and storybook configurations.
- Create the initial frontend implementation for the cart feature on the buyer site; the Call Seller feature, which in itself involves communication, planning, and integration with a 3rd-party service provider; and other high-impact features.

Developer   **BTX Trader**
February 2014 - December 2014   Manhattan, NY

- Received exposure to the Bitcoin industry as well as an understanding of the core concepts regarding cryptocurrencies i.e. decentralized networks and cryptography.
- Worked as the only developer apart from the CTO in a tiny startup of four where I received firsthand experience to the intricacies of developing a product.
- Helped deliver, design, and implement financial tools and services on the web for the nascent industry.

EDUCATION

Bachelor of Science, Computer Science   **Rutgers State University**
Graduated May 2013   New Brunswick, NJ

Courses: Internet Technologies, Software Engineering, Operating Systems
Notable Projects: Multi-threaded bittorrent CLI, Simple FUSE filesystem

ABOUT ME

A curious tinkerer and thinker, indiscriminate of topic. Most of my requested vacation days are spent either traveling, mountain biking or some combination of the two. The majority of my entertainment is from watching sixty symbols videos or David Attenborough nature documentaries. Alright, and maybe Westworld too.
