

# PROTOSURE

- Sign up and use, same day.
- \$999 a month, no long-term contract required.
- All data securely stored, backed up, and encrypted on Amazon Web Services.
- Two Factor Authentication available for all users, at no additional cost.
- An integrated development environment designed for business users, not coders. Launch a new product in days!
- The simplicity of a spreadsheet, with the power of a modern policy platform.

# PROTOSURE

Policy issuance as a service.

**\$999/MONTH**

Protosure is a cloud-based, programming-free, **submit, underwrite, rate, quote, and policy issue** system.

Log in, prototype, and launch a new product in **days**.

### SUBMISSION FORMS

Drag & drop submission form builder, with built in address checking, schedule builder, conditional logic, payment checkout (using Stripe), real-time preview and much more! Take any existing policy application form and turn it into an online automated submission system.

Embed your always up-to-date submission form in any public or private web page—even multiple pages simultaneously.

Track with your own Google Analytics ID.

### UNDERWRITING

Create any rule using simple spreadsheet formulas that can simply reference any aspect of your product. Multiple underwriting warning types supported, including submission blocking and explanatory pop-ups.

### SPREADSHEET-BASED RATING SYSTEM

Upload your rating spreadsheet and you're done! **Not** a simple table parser; fully run your existing spreadsheets in the cloud as your rating calculation backend.

Choose your inputs and outputs, and see your product come alive!

### VERSIONING

Insurance product changes are all automatically versioned and referenceable from all parts of the system.

### REPORTING

An infinitely configurable and fast submission tracking and reporting system with fully custom calculated columns. Have an unlimited number of customized reports stored with your profile, instantly exportable as CSV and XLSX. **All** quote and policy data available for **any** report, at **any** time.

### SUPERSEARCH

Any customer data ever entered is immediately available from a single search field, with rich previews as you type.

### DOCUMENT CREATION

Issue an unlimited number and type of documents. Reuse existing PDFs, or create your own custom documents from MS Word documents. Define triggers for document creation with a simple visual rule builder.

### CLOUD-BASED

Nothing to install, nothing to maintain.
